

FAITHLESS TO HEADLINE L.I.V.E. IN PUERTO BANUS

International dance superstars Faithless will headline the L.I.V.E. event at the bullring in Puerto Banus on July 31. The concert, organized by Kings of Production, will feature Faithless – Maxi Jazz, Sister Bliss and Rollo. They will be supported by British reggae pioneers Black Slate, rising British bassline trio Platnum and DJs Tall Paul and Levi Lewis. To their millions of fans worldwide, Faithless need no introduction. When they emerged in the mid-1990s, the idea that a dance music act could produce rich full-length albums rather than one-off tracks, pack out live concerts, and bring together all kinds of genres and music fans, seemed quite revolutionary. Fourteen years, several albums and numerous global tours, festivals and hits later, those Faithless qualities have become benchmarks of the 21st-century music scene. Money from the event will be going to Málaga children's home Ciudad de los Niños, which cares for more than 50 children in residence, from infants to 18-year-olds. * **Tickets for the event, which begins at 6pm, are priced at €50 and €70 and available from www.ticktackticket.com. For information on Facebook, follow Kings of Production.**

SOCCER FOR KIDS IN MARBELLA

Soccercamp International has joined forces with top coaches from The Duet Academy of London to launch the summer 2010 programme Soccercamp for Kids at a pro training facility in Marbella. Kids aged five to 17 will enjoy training with FA/UEFA-licensed coaches and playing on natural grass pitches. Lunch is included, since kids will need all the energy they can get following a comprehensive itinerary which includes warm-up, skills and drills, competitions, mini matches, theory and practice. * **Tel: +44 7931 237 361. www.soccercampinternational.co.uk**

INSTITUTE OF TECHNOLOGY FOUNDS NEW RESEARCH CENTRE

The new Instituto Tecnológico de Málaga (M.I.T. Málaga) plans to open a research, development and innovation centre whose aim is to find ways to improve the learning process. The Centre will consist of groups of national and international scientists specialising in the fields of computers,

psychology, philosophy, the humanities and medicine. Parents of M.I.T. students, education experts, public organisations and technological companies will also form part of the Centre, as will all teachers at the M.I.T. Some of the projects at the Centre will include the establishment of an 'open living lab' to study education innovation, the creation of virtual learning initiatives and research on ways to approach education from a more integral perspective so that intellectual, social, spiritual and physical improvement are part of every course. * **Parque Tecnológico de Andalucía, C/ Severo Ochoa 63, Campanillas, Málaga. Tel: 620 729 868. www.colegiomit.com**
